EQUIPMENT BREAKDOWN COVERAGE

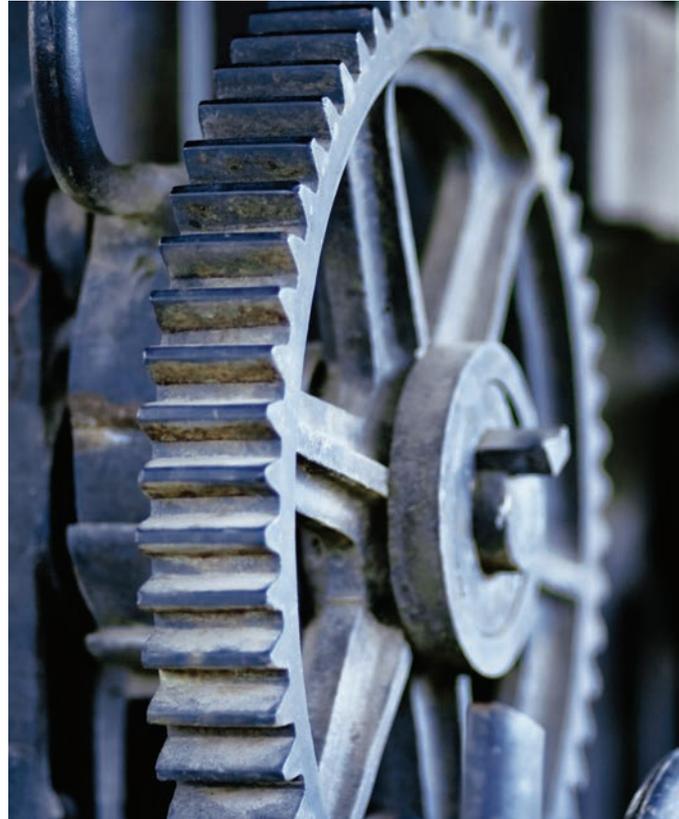

Most businesses today rely on mechanical and electrical equipment to keep their operations running smoothly. Yet, equipment breakdown is not covered by most standard commercial property policies.

At Granada Indemnity, we understand equipment failure can quickly grind operations and income to a halt, so we embed Equipment Breakdown Coverage* into our policies.

What We Cover

We cover over 1,000 types of equipment, including, but not limited to:

- boilers and pressure vessels
- air conditioning units
- refrigeration units
- motors, pumps
- compressors
- data processing equipment
- business and communication equipment, and
- electrical equipment for losses due to mechanical breakdown, steam explosion and electrical arcing.

Our equipment breakdown coverage is provided in partnership with Mutual Boiler Re. For more information, please visit Mutual Boiler Re's website at www.mutualboilerre.com.

Questions?

If you would like to speak with a Granada Indemnity representative about Equipment Breakdown Coverage, please call:
